**MEMORANDUM FOR: Project Director of Administration**

**ATTENTION : Project Personnel Officer**

**SUBJECT : Crew Chiefs**

25X1

In connection with the procedure outlined in our memorandum, [ ] it is felt the contemplated procedure is extremely hazardous from a security viewpoint, and should only be undertaken in an absolute emergency. To accomplish the processing within the time element involved, it is necessary that the personnel concerned be immediately designated to enable a complete review of appropriate security papers. After selection and clearance an extremely strong briefing regarding responsibilities should be given by a senior Project Air Force Officer and a Security Officer. A similar briefing will necessarily have to be accomplished with the conclusion of the assignment. Our personnel at WASHINGTON will have to be fully advised as to the status of these individuals; i.e., their lack of project knowledge, and be required to establish steps to insure isolation from project personnel in discussions.
